

GRATITUDE

It is remarkable and credits to our profession that so many medical scientists and biologists are willing to critically review scientific papers. The Editorial Board recognizes the time, energy, and expertise this requires.

Internet enabled scientific communication to become faster and easier also facilitating a rapid increase in the amount of not peer-reviewed medical and biologic information available to all. As a consequence, we believe that the role of "JOP. Journal of the Pancreas", as a free-standing journal that guarantees the rapid dissemination of peer-reviewed scientific knowledge, is more important than ever.

We depend on the individuals listed below for our ability to publish important readable and reliable papers in such a timely manner.

Thank you to our Reviewers of the year 2011
